

## Dividers Profiles

Aluminum divider profiles are used to separate spaces or panels within doors, windows, partitions, or glass installations. They offer structural support while maintaining a clean, minimal look. Ideal for both functional and decorative applications, and available in various finishes and sizes to suit your design needs.

## Hinges Profiles

Hinges profiles are essential components in aluminum door systems, designed to house and support hinge mechanisms. They ensure proper door alignment, smooth operation, and long-term durability. Suitable for residential, commercial, and industrial applications, and available in mill finish, anodized, or powder-coated options.
